

CENTERS FOR DISEASE CONTROL AND PREVENTION (CDC) COALITION

c/o American Public Health Association 800 I Street, NW, Washington, D.C. 20001 (202) 777-2514

May 15, 2008

The Honorable David Obey
Chairman
Appropriations Subcommittee on Labor,
Health and Human Services, Education
and Related Agencies
2358 Rayburn House Office Building
Washington, DC 20515-6024

The Honorable James T. Walsh
Ranking Member
Appropriations Subcommittee on Labor,
Health and Human Services, Education
and Related Agencies
1016 Longworth House Office Building
Washington, DC 20515-6024

Dear Chairman Obey and Representative Walsh:

The undersigned members of the CDC Coalition urge you to provide at least \$7.4 billion for CDC's FY09 "core programs" as you move forward with your work on the FY09 Labor-HHS-Education Appropriations bill. This request does not include the mandatory funding provided for the Vaccines for Children Program (VFC). Our request reflects the support CDC will need to fulfill its core missions for fiscal year 2009. We strongly believe that the activities and programs supported by CDC are essential to protect the health of the American people.

The CDC Coalition is a nonpartisan coalition of more than 100 groups committed to strengthening our nation's prevention programs. Our mission is to ensure that health promotion and disease prevention are given top priority in federal funding, to support a funding level for the Centers for Disease Control and Prevention (CDC) that enables it to carry out its prevention mission, and to assure an adequate translation of new research into effective state and local programs. Coalition member groups represent millions of public health workers, researchers, educators, and citizens served by CDC programs.

CDC is faced with unprecedented challenges and responsibilities, ranging from bioterrorism preparedness, chronic disease prevention, eliminating health disparities to combating the obesity epidemic. In addition, CDC funds community programs in injury control; health promotion efforts in schools and workplaces; initiatives to prevent heart disease, cancer, stroke, and other chronic diseases; improvements in nutrition and immunization; programs to monitor and combat environmental effects on health; interventions to improve oral health; prevention of birth defects; public health research; strategies to prevent antimicrobial resistance and infectious diseases; and data collection and analysis on a host of vital statistics and other health indicators. It is notable that more than 70 percent of CDC's budget supports state and local health organizations and academic institutions.

CDC serves as the command center for our nation's public health defense system against emerging and reemerging infectious diseases. From pandemic flu preparedness and prevention activities to West Nile to smallpox to SARS, the Centers for Disease Control and Prevention is the nation's -- and the world's -- expert resource and response center, coordinating communications and action and serving as the laboratory reference center. States and communities rely on CDC for accurate information and direction in a crisis or outbreak.

The CDC Coalition believes that CDC programs are crucial to the health of millions of Americans, key to maintaining a strong public health infrastructure, and essential in protecting us from threats to our health. We are grateful for your support in the past and urge you to support a funding level of \$7.4 billion for CDC's "core programs" in FY 2009.

Sincerely,

AIDS Action
