

CENTERS FOR DISEASE CONTROL AND PREVENTION (CDC) COALITION

c/o American Public Health Association 800 I Street, NW, Washington, D.C. 20001 (202) 777-2514

Fiscal Year 2012 Budget Request: \$7.7 Billion

The CDC Coalition is a nonpartisan coalition of more than 130 groups committed to strengthening our nation's prevention and health promotion programs. Our mission is to ensure that health promotion and disease prevention are given top priority in federal funding, to support a funding level for the Centers for Disease Control and Prevention (CDC) that enables it to carry out its prevention mission, and to assure an adequate translation of new research into effective state and local programs to protect individuals from preventable death and disability. Coalition member groups represent millions of public health workers, researchers, educators, and citizens served by CDC programs. **For fiscal year 2012, the CDC Coalition supports a funding level of \$7.7 billion** for CDC's core programs. In the views of the coalition this request represents the minimum acceptable funding level as the actual resources needed to fully address the needs of those served by CDC's programs is far greater.

CDC continues to be faced with unprecedented challenges and responsibilities, ranging from chronic disease prevention, eliminating health disparities, bioterrorism preparedness, to combating the obesity epidemic. In addition, CDC funds community programs in injury control; health promotion efforts in schools and workplaces; initiatives to prevent diabetes, heart disease, cancer, stroke, and other chronic diseases; improvements in nutrition and immunization; programs to monitor and combat environmental effects on health; interventions to improve oral health; prevention of birth defects; public health research; strategies to prevent antimicrobial resistance and infectious diseases; and data collection and analysis on a host of vital statistics and other health indicators. It is notable that more than 70 percent of CDC's budget supports state and local health organizations and academic institutions, many of which are currently struggling to meet growing needs with fewer resources.

CDC serves as the command center for our nation's public health defense system against emerging and reemerging infectious diseases. From pandemic flu preparedness and prevention activities to West Nile to smallpox to SARS, CDC is the nation's -- and the world's -- expert resource and response center, coordinating communications and action and serving as the laboratory reference center. States and communities rely on CDC for accurate information and direction in a crisis or outbreak.

In addition to being key to maintaining a strong public health infrastructure and protecting Americans from public health threats and emergencies, the CDC Coalition believes that CDC programs play a crucial role in reducing healthcare costs and improving the public's health. Despite the progress CDC has made to meet these needs, the agency's core programs have been woefully underfunded to confront the myriad of public health issues facing the country. We are grateful for your support in the past and urge you to **support, at a minimum, a funding level of \$7.7 billion for CDC's "core programs" in fiscal year 2012.**

| FY10 Actual | FY11 CR | FY 12 Request | FY 12 CDC Coalition Request |
|----------------|----------------------|------------------|-----------------------------------|
| \$6,397 | \$5,649 ¹ | \$5,893 | \$7,700 |

Budget authority in millions of dollars

¹ Total CDC funding in FY 2011 includes the .2 percent across the board cut called for in the continuing resolution.
